

# BMT Piezo-Controller up to 4 ports with MPD-200A

- Up to 4 ports internally equipped with MPD-200A Takasago Piezo-Driver
- Each port can operate up to two Takasago piezo pumps in parallel
- Each port can be controller with 50 to 340Vp-p and up to 60Hz
- Program linear flow volume using voltage and / or frequency start and end parameters

*Start networking fluidic experiments*

### Fluidic network

Combine different BMT Controller to a fluidic network using LAN cable or Wi-Fi

### Software controlled & programmable

Easily program fluidic operations and control all devices using the BMT PC-Software.

### Stand-Alone solution

Start fluidic programs directly at the controller from an USB-Stick.
